

Product Sales Report v1.2

User's Manual

Thank you for purchasing the Product Sales Report plugin. This brief manual will guide you through installing and using the plugin.

Installation

1. Login to your WordPress Admin and select "Plugins" > "Add New" in the left sidebar menu.
2. Click "Upload Plugin" at the top of the page.
3. Select the plugin ZIP file and click "Install Now".
4. Click "Activate Plugin".
5. Select "WooCommerce" > "Product Sales Report" from the left sidebar menu.
6. Enter your license key, which was displayed after checkout and sent to you by email.
7. Click "Activate".

The plugin is now installed and ready for use. Please note that you must also have the WooCommerce plugin installed and activated in order for the Product Sales Report plugin to function.

Generating Product Sales Reports

1. In your WordPress Admin, select "WooCommerce" > "Product Sales Report" from the left sidebar menu.
2. Optionally, load a previously saved report preset by selecting its name in the "Load Preset" field.
3. Set the report options:
 - **Report Period:** The period of time to report on. The "Last 7 days" and "Last 30 days" options will report on sales made in the 7-day or 30-day period ending yesterday (today's sales are not included). The "Custom Date Range" allows you to specify your own start and end dates for the report.
 - **Product Category:** Select "All Categories" to report on all products in your store, or choose a specific category to limit the report to products in that category.
 - **Product Variations:** Select "Group product variations together" to treat all variations of a product as the same product, or "Report on each variation separately" to treat each variation as a separate product.
 - **Sort By:** Choose the order in which results are displayed in the report.
 - **Report Fields:** Select which fields should be included in the report. Drag-and-drop the field names to change their order.
 - **Show only the first ___ products:** If you only want the first n results, select this option to help speed up the report generation.
 - **Include header row:** Uncheck this option if you do not want the field names included as the first row of the report.
 - **Create New Preset:** Enter a preset name if you would like to save your report options for future use.
4. Click "Download Report" to generate and download the report in CSV (Comma-Separated Values) format, or enter an email address and click "Email Report" to send it as an email attachment.
